CloudDesktop
Built to Empower Businesses Both Large and Small

Desktop

RapidScale is the global leader in Desktop as a Service. With Cloud-Desktop, you can access your apps on any device globally. Rapid-Scale's CloudDesktop solution allows organizations to move all of their applications and desktops to the cloud. You're then able to access your virtual desktop environment through an Internet connection from any device, anywhere in the world!

Hardware Refresh

CloudDesktop helps extend the life of existing hardware by no longer relying on the local machine to perform tasks or run applications.

BYOD Compatible

Users can access their virtual desktop environments from any device including tablets, desktops, smartphones, thin and zero clients, laptops, and more.

Cost Effective

By combining compute, licensing, upgrades, management, & more into a simple monthly charge, businesses reduce capital spend and get the latest technology.

Scalable

Businesses get the ability to rapidly add new users with the single click of a button – deploying the desktop and applications to anyone in the organization.

Features

- Build your own solution based on your user's needs, applications, and workload

- Add standard apps or custom apps to your environment

- Select a fully managed solution for complete simplicity with end-user device management, infrastructure management, automatic upgrades and updates, and more.

- Get superior 24x7x365 live support

Any Device, Anywhere

Access CloudDesktop via PC, Mac, Linux clients, tablets, thin clients, and smartphones. As long as there is an Internet connection, you are able to connect to your CloudDesktop.
Enterprise-Level Security

Our optional enterprise security team and software will protect your business from viruses, malware, and rogue employees at an infrastructure level. RapidScale's infrastructure is secured through SSL encryption at 2048-bit. Our software applications are streamed and hosted using 256-bit AES encryption.

Cost Effective

One of the key benefits of virtual desktops is that Desktop as a Service can dramatically reduce the total cost of ownership (TCO) compared to traditional desktops.

Managed Environment

RapidScale offers a fully managed solution that eliminates the need for IT teams to worry about patches, upgrades, end-user device troubleshooting, application integrations and testing, and much more. RapidScale's CloudDesktop makes it simple and convenient for businesses to manage their users and corporate data within a virtual environment.
